Experience

- **JP Morgan Chase & Co.** | SDE I, Backend Developer *July 2024 - Present*
  - Automated production deployments for **29+** applications, reducing end-to-end deployment time from **48 hours to 6 hours** by transforming a 3–4 step manual deployment process into a single-click workflow using an enterprise release orchestration platform.
  - Built a centralized Servicenow health-check portal providing a live operational view across **14 instances**, **380 applications**, **250+ mid servers** and **1150+ scheduled jobs**
  - Automated proactive checks for endpoint availability, MID health, job failures, and credential drifting, reducing reactive support effort and improving incident detection/recovery speed
  - Implemented release readiness/SDLC health gates (pre/post checks, environment sanity) to catch issues earlier and improve change quality, reducing the change failure rate from **40%** to **15%**

- **JP Morgan Chase & Co.** | SDE Intern, Backend Developer *Jan 2024 - June 2024*
  - Reorganized Jenkins pipelines with standardized stage separation and structured logging, reducing deployment failures by **10%** while improving deployment traceability.
  - Enhanced the error logging framework by introducing component-level status codes, reducing debugging time by **20%** and enabling faster root-cause analysis of production issues.

- **JP Morgan Chase & Co.** | SDE Summer Intern, FrontEnd Developer *June 2023 - Aug 2023*
  - Contributed to Version 2 of an internal application by redesigning UI components using React.js and refactoring legacy code into reusable modules across 10+ components.
  - Built responsive frontend features that improved usability and streamlined workflows for internal stakeholders across multiple teams.

Projects

- **Learning Management Portal - Code for Good Hackathon**
  - Engineered a centralized Learning Management System using the MERN stack with JWT-based authentication, role-based access control, personalized dashboards, and secure course enrollment for Admin, Teacher, and Student.
  - Developed discussion forums, assignment management, curriculum resources, and live meeting integration to deliver an end-to-end digital learning platform within a 24-hour hackathon.

- **Employee Rewards Application - JP Morgan Internal Hackathon**
  - Developed a production-grade employee rewards platform using Spring Boot, React.js, and MySQL, designing RESTful APIs secured with JWT authentication.
  - Integrated automated deployment through Jenkins and Gaia Cloud, maintaining high code quality with SonarQube and achieving **80%** + automated test coverage.

Technical Skills

- **Languages**: Java, Javascript, C++, Python, SQL
- **Framework**: NodeJs, *Spring Boot*, ExpressJs, Rest APIs, ReactJs
- **Databases**: MongoDB, MySQL, PostgreSQL,Redis
- **Core CS**: Data Structures & Algorithms, OOPs, Software Engineering, Computer Networks, Operating Systems
- **Tools**: Git, Github, Jenkins, Docker, Linux

Coding Profiles

Platform	Profile	Max Rating
Codeforces	*kingusss7677*	*1398 (**Pupil**)*
Leetcode	*Shailesh88*	1508

Achievements

- **Google Developer Student Club Lead**: Led a community of 700+ students by organizing technical workshops, hackathons, coding sessions, and industry collaborations to promote hands-on learning.
- **Microsoft Learn Student Ambassador**: Conducted technical sessions and promoted Microsoft developer technologies while helping build a community of 700+ students.
- **Leetcode**: Solved 326+ problems on LeetCode with a maximum rating of 1508.
- **Codeforces**: Achieved Codeforces Pupil with a maximum rating of 1398.

Education

- **Chandigarh Engineering College, Punjab** | B.Tech, Computer Science & Engineering *Aug 2020 – Aug 2024*
  - CGPA: **8.2/10**
